

## **Welcome to Edgenuity Science with Mrs. Bobo!**

I am so excited to teach you! I have broken this email up into 4 parts, so that if you need to, you can access it in the future for any information you might need.

### **Introduction:**

I see a lot of familiar names in my student rosters, and a lot of new names! I am really looking forward to getting to know each of you. For those of you that do not know and for those of you that have forgotten, I am going to tell you a little bit about me. I have been a science teacher for 14 years, and I LOVE it! I say everyday I have the best job in the world. One of my favorite things is seeing that A-ha moment that students have when they learn something new about our world. In addition to being a teacher, I am also an avid crafter! I love to make things, it is the way I de-stress. Among some of my passions are watercolor and acrylic painting, knitting and crocheting, custom design cups, apparel, and decorative accessories. I am also a wife and mother. My husband of 16 years is a PhD Chemist and my best friend. He and I share a love of games and pop culture. We have two amazing children; Vivy (13) and Preston Lee (9). Vivy is a cheerleader and very self-confident. She is currently in the 8th grade, and loves school. Preston Lee our son is 9 and loves to read, play video games, and all things superhero. We have lived in Stillwater for 6 years as a family. our children were both born in Oklahoma City, but my husband and I are from different states. I am from San Antonio, Texas and grew up there, until I came to Oklahoma when I was entering my 3rd year of college. My husband grew up in Alabama, until his mother became ill and they moved to Oklahoma to be closer to his grandparents.

Now that we know each other a little better, I feel I can share my feelings about Virtual Teaching. I am currently excited to teach you in this virtual platform, but I am also sad, because I will not see your smiling faces everyday. I know that I will struggle with not having that connection with students and not being able to gage with visual cues when you are struggling. I am also a social person, so being a teacher without students to see in person everyday is hard for me. However, I know that with all of us working together this is going to be a great year!

## Zooms Meetings!

I would like to Zoom with all of my students next week. Students, please fill out this [form](#) to tell me when you are available. I would like to make this our weekly check-in time, but this week it will just be a get to know you time. If you are unable to meet with me during these times, please contact me to find a time that will work, because I MUST meet with you sometime next week.

## Office Hours/ Contact

I am working Monday through Friday and available to students during that time. If you need me you can call me at 405-707-5441 or you can email me at [Jbobo@stillwaterschools.com](mailto:Jbobo@stillwaterschools.com). Please know that my phone is a landline and will not accept text messages. Therefore, if I am not sitting at my desk to answer your phone call, email will get you the quickest response.

**Monday/ Tuesday** 7:15am to 1:00pm and 5:00pm to 7:00pm

**Wednesday/ Thursday/ Friday** 7:15am to 11:20am and 12:00pm to 3:00pm

## Edgenuity

For this first short week, get logged into Edgenuity and try a lesson or two from each of your courses. Next week, I will follow up this email with some information about how I will be helping you through this semester to complete your Science work. However, keep in mind that I have many students and there will usually be a 24 hour delay before I answer any questions or clear any flags within the program.

Mrs. Jenny Bobo M.S.

7th and 8th Grade Virtual Science Teacher

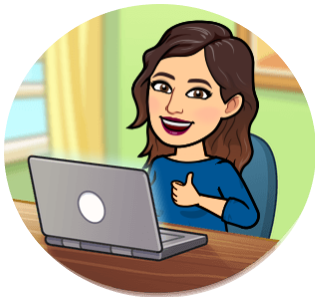

Middle School Science Department Head

Stillwater Middle School (homesite) / Stillwater Junior High School

Stillwater Education Association Vice-President
