

While you are waiting . . .

1. Get out a piece of paper, and write BellWork on the top line.
2. Then I want you to go to the board with the Post-it notes 2 at a time. That means if there are two people up there, you wait quietly at your seat.
3. While you are waiting at your seat make 3 guesses to what you think will be a common theme under each question. So, you will have 1 guess per question.
4. While you are at the board look at the notes, and make observations about what you see.

Pin Drop Demonstration

- I need you to guess.
- I have an Erlenmeyer coffee cup filled with water on the teacher demonstration desk.
- I want you to guess how many sewing pins I can place in the cup before it over flows.

Draw A Scientist Test

When you are finished with your Pin Drop Handout retrieve a Draw a Scientist Test and fill it out. There are no real right answers, however, not completing the assignment would be bad. Please take this with you today and finish it at home if you do not finish in class.
